Here's The News!

## POOR ENGLISH MAY CAUSE TROUBLE

Going by air is probably the (1)  means of travelling. After all, there are no traffic jams in the air and the possibility of being hit by a flying plane is close to zero. But the latest research shows that there is a problem: a (2)  knowledge of Aviation English. Aviation English is the (3)  language of civil aviation which means that all pilots, even if they fly in their own countries, have to use English when communicating with air traffic controllers. That's why both pilots and controllers need to pass the Aviation English exam before they start working. The exam is (4)  than an average exam, but our safety depends on it. However, the research says that quite a lot of (5)  pilots cheat during their English tests. What is more, air traffic controllers' English is sometimes as (6)  as the pilots' so it may cause (7)  misunderstandings in communication. And that can result in the (8)  accidents.

The researchers recommend pilots should take an English test from time to time. If they fail, they should retake it.
